PREPARATION

Knead DOLCE FORNO, yeast and 2/3 of the dose of water indicated in the recipe.

When the dough begins to take shape, pour the remaining water gradually in more than once and keep on kneading until the dough is well-combined and smooth.

At the end, add softened butter in 2-3 times.

Make sure that the temperature of the dough is 26-28°C.

We suggest to cut out a 250g piece of dough and to put it into a 1L jug to check the pace of the leavening.

Let rise for 12-14 hours at 20-22°C with the 70-80% in the proofer room, until the dough quadruples its initial volume. If the proofer room is devoid of humidifier, cover the dough with a nylon cloth.

Pour the remaining egg yolk gradually in more times (about ½ kg each time).
Add softened butter gradually in more times (about ½ kg each time) and knead until the dough is smooth.
At the end, gently combine PEPITE DI CIOCCOLATO.
Let the dough rest at 28-30°C for about 45-60 minutes.
Divide the dough into portions of the required size and roll each portion up into into a ball shape (consider 1.1kg of dough to make a 1kg panettone).
Move onto boards or trays and leave to rest for another 15-20 minutes.
Roll them up tight again and transfer into the specific paper moulds.
Put in the proofer room at 28-30°C with relative humidity of about 70%, until the top of the dough nearly leans out of the edge of the mould. If the proofer room is devoid of humidifier, cover the dough with plastic sheets.
N.B. If you want to add some flavourings to personalize your products, you can add them to the second dough.

FINAL COMPOSITION

At the end of the rising, leave the panettoni exposed to the air for 10 minutes until a light film forms over the surface.

With a small, sharp knife, make two superficial cuts to create a cross (these cuts shall not be deep and are necessary to give end product the typical and traditional shape).

Place a pat of butter in the middle of the cross and bake at 170-180°C (time depending on the weight) until the temperature of the center reaches 92-94°C.

As soon as they are removed from the oven, the panettoni should be placed onto the specific toothed racks and left to cool upside down for 8-10 hours at least before being wrapped in Moplefan bags.
